

Wages and Schooling: A Toy Example

A. Author

July 4, 2026

1 Introduction

This short paper illustrates a wage regression on schooling and age using a synthetic survey. All results are produced by `code/analysis.do`.

2 Results

Table 1 reports the main regression of log wages on years of schooling and age.

	Coefficient	Std. Err.
Education	0.883	0.039
Age	0.036	0.012

Table 1: Wage regression
